

Clinic Appointment: 17/06/19 11:30, Consultant Cardiology

**Consultation Summary:**

1. CTCA 2017 shows angulated LMS and mild atheroma only
2. DSE at Ealing was negative
3. Aortic root is 4.2cm - unchanged
4. Recurrent symptoms and pains in neck
5. Repeat CTCA shows no coronary plaque; aortic root is 3.8cm
6. Repeat Echo shows Sinus of Valsalva 4.2cm, Ascending Aorta 3.8cm; mild AR

JUNE '19

This pleasant gentleman's CTCA is very reassuring with no coronary plaque seen on the repeat CTCA. The aortic root is consistent on the CTCA and Echo at 3.8cm providing us reassurance. There is mild AR
